# Jilm drsný

A close-up photograph of a green, serrated leaf, likely from a tree. The leaf is ovate with a prominent midrib and secondary veins. The margins are finely serrated. The leaf is attached to a stem that shows small, reddish-brown lenticels. The background is dark and out of focus.

**Jilm drsný**

A close-up photograph of several large, bright green leaves with prominent, serrated margins. The leaves are ovate with a long petiole and a distinct network of veins. The background is a soft-focus green, suggesting a dense canopy. The lighting is natural, highlighting the texture of the leaf surfaces.
